## Capfoundation 2014 Annual Report

**PATHOLOGISTS** 

Our Mission

The CAP Foundation champions *patient-centered* and *humanitarian roles* for pathologists. The CAP Foundation strives to *connect people*, especially those in need, to the specialized, life-saving skills of pathologists.

Since 1963, we have also supported leadership, quality, and research grants and awards to enhance and develop leadership, medical specialty, and research skills to build the capacity of pathologists in the delivery of next-generation patient care.

Through the generous financial support of CAP members, staff, industry, foundations and patient advocacy groups, the CAP Foundation serves as the leading philanthropic organization for pathologists.

### Your Support Defined Our Strength in 2014

### Our **Year**

### **Dear Friends of the CAP Foundation.**

In 2014, the CAP Foundation focused on delivering results and building a lasting impact. With your support, we planned boldly while investing prudently. Together, we brought preventive medicine and the expert training of pathologists and clinical teams to communities in need—to the public and patients where your donations are making a measurable difference.

With the launch of our new health care informatics awards for residents, we continued augmenting pathology education to grow the next generation of pathologists.

In the pages that follow, we share stories of that service to communities in need through grants you made possible. We deliver details and data that demonstrate how our donors make all the difference in the lives of many.

But first, as a personal preface, we share with you several significant strides we made in 2014 toward building a lasting impact, particularly for our signature program, See, Test & Treat.

Most notably, we completed strong foundational research funded through our Robert Wood Johnson Foundation (RWJF) grant. Here, aiming toward ongoing expansion to reach more communities in need, we distilled and presented to RWJF recommendations to gain ground in four broad areas:

- Increasing See, Test & Treat program impact
- · Planning program growth
- Promoting pathologists' roles in public health
- Preparing for further evaluation research on the See, Test & Treat model of care

And perhaps the most major milestone reached last year: We launched a new resource through the hard-working pathologists and our Communities of Practice. With this, we established and now facilitate the ongoing Communities of Practice forum to support innovation within See, Test & Treat to maintain consistent care and to continually raise standards of care.

These strides signal progress and promise. The sum of our work with RWJF is targeted for publication in a peer-reviewed journal. Additionally, RWJF is on board to leverage its own communication channels to help disseminate this seminal research upon publication. Our associations with RWJF and other similar organizations both large and small signal our growing strength, a power made possible only through you, our dedicated donors and supporters.

On behalf of the entire CAP Foundation board and staff, thank you for fueling our mission in 2014. With gratitude, we look forward to another year of progress on behalf of pathologists, patients, and those who need our skills and resources.

### Sincerely.

Lewis A. Hassell, MD, FCAP, President Jennifer Laudadio, MD, FCAP, Vice President

# Programs and

Programs	75%
Fundraising	8%
General & Admin	17%

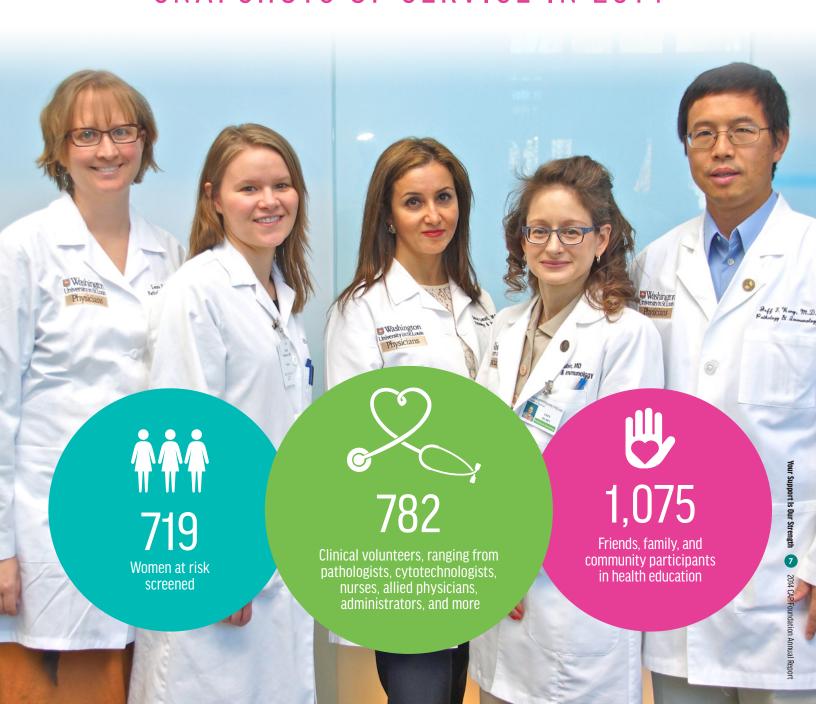

### Our Impact: 2014 seetest&treat®

### Strengthening Results, Extending Our Reach

Donors made a difference in 2014, fueling See, Test & Treat programs in which pathologists lead the coordinated delivery of free cervical and breast cancer screening and same-day results to women in need.

Backed by our 2014 proven success, the CAP Foundation is on track to deliver on an ambitious goal: Fund up to 11 See. Test & Treat events in 2015.

### SNAPSHOTS OF SERVICE IN 2014

# Public Health Data Underscores Urgent, Continued Need for seetest&treat

### The American Cancer Society reports that in 2014:

"The prevalence of recent Pap test use was lowest among women with no health insurance and recent immigrants—those living in the US less than 10 years."

"Reaching those populations can be difficult and costly and requires ongoing coordination with community partners and health care providers."

"However, this targeted approach is most effective for reducing the burden of these cancers and the associated disparities associated with their diagnosis and treatment."

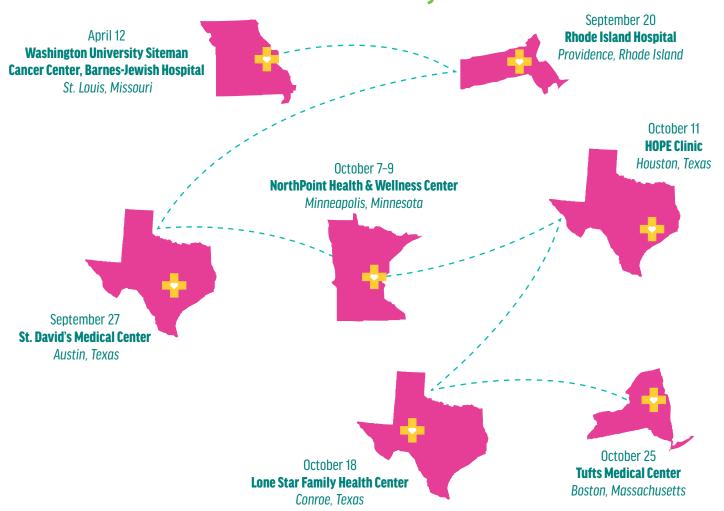

In a 2013 survey of health care access, affordability, and insurance complexity, the Commonwealth Fund reports that:

"More than one third (37%) of US adults **went without recommended care**, did not see a doctor when they were sick, or failed to fill prescriptions **because of costs**."

### Help Keep Up Our Good Work

- Through financial, matching, and in-kind donations
- Through time, expertise, and service
- Through planned giving and recurring donations

### Where have we been this year?

### Meet Next-Generation **Pathologists**

### **Advanced Training Elective in Translational Diagnostics**

This award provides four week of hands-on training focused on developing novel histopathology assays.

### **Host & Site:**

Ventana Medical Systems. Tucson, Arizona

### **Award Recipients:**

### Daniel J. Fix, MD

University of Maryland Department of Pathology College Park, Maryland

### Gaining Insights, Spurring Interests

"The training made me rethink my preconceptions about industry and academics, realizing that many of my professional goals can be met in either setting. It was valuable to see how new tools are developed for use in the clinical setting, and the vast amount of work that goes into not only identifying new biomarkers, but the even more difficult task of turning that into a reliable assay for clinical use. It also gave me insights into new and exciting areas of interest in colorectal carcinoma research."

University of Calgary Alberta, Canada

### Supplementing Pathology Education

"At Ventana, I was able to learn about critical aspects of the practice of pathology including topics to which we have limited exposure during residency. An obvious example is in regard to immunohistochemistry (IHC), one of Ventana's core business activities. Residents often order IHC stains to assist with diagnosis, as prognostic and predictive markers, and to help determine patient therapy. However, they frequently do not understand IHC intricacies and issues. At Ventana, not only did I learn about the development of IHC stains from concept to commercial product, I was able to also contribute to the development of several stains. This experience and knowledge will serve me well as a pathologist."

### Geraldine Colby Zeiler Cytotechnology Awards

Through the generosity of William B. Zeiler, MD, FCAP, and in honor of his late wife, who was a Mayo Clinic-trained cytotechnologist, this fund awards up to five cytotechnology students during their training.

### **Award Recipients:**

### **Melody Castellon**

UCLA School of Cytotechnology Los Angeles, California

### **Tamara Cobb**

**Medical Education Training Campus** Cytotechnology Program Ft. Sam Houston. Texas

### Sarah Goletz

Indiana University School of Medicine **Health Professions** Cytotechnology Program Indianapolis, Indiana

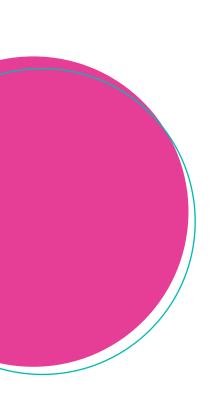

### Mohini Mehta

Rhode Island School of Cytology Providence, Rhode Island

### **Jeffrey Wilks**

**Medical Education Training Campus** Cytotechnology Program Ft. Sam Houston. Texas

### 2014 William R. Bynum, MD, Scholarship Fund: **Medical Technologist Award**

Working with the Missouri Society of Pathologists, the CAP Foundation supports the advancement of medical technologists in their final academic year.

### Award Recipients:

### **Caroline Braun**

North Kansas City Hospital School of Clinical Laboratory Science Kansas City, Missouri

### **Amanda Kampwerth**

Mercy Hospital School of Clinical Lab Science St. Louis, Missouri

### **Informatics Awards**

New in 2014, the CAP Foundation supported pathology resident travel to the CAP's annual conference to gain continuing education and exposure that will advance knowledge of medical informatics in pathology and the related impact on patient care.

### **Award Recipients:**

### Caleb Cheng, MD

Cedars-Sinai Medical Center Los Angeles, California

"In this amazing experience, I attended several courses including one that detailed informatics experiences at Massachusetts General Hospital (MGH). In October, I will be rotating at MGH for pathology informatics, and so I was able to arrange for additional learning experiences at the institution. I also learned about the basics of these technologies over several sessions. All of this knowledge will serve me well in the coming year."

### Lik Hang Lee, MD

University of Calgary

Alberta. Canada

"At the conference, I learned innovative ways to make electronic medical records and laboratory information systems have a stronger and more engaging impact on clinicians with the goal of improving patient care. I gained tremendous knowledge about new products and innovations through the vendor exhibits. Furthermore, I was able to meet and network with several of the 'big name' pathologists in informatics. This is an important step in the development and integration of pathology informatics into my professional career."

### Patrick C. Mathias, MD, PhD

University of Washington Medical Center

Seattle, Washington

"Multiple sessions helped me achieve my learning goals, which were to learn general approaches to managing test utilization and assigning value to laboratory services, as well as to learn about next-generation sequencing experiences at other institutions. I came away with many good ideas for utilization and informatics best practices, and I gleaned multiple examples of focused, informatics-based quality improvement projects-all of which I will disseminate to faculty at my institution."

From left to right: Melissa M. Blessing, DO Lewis A Hassell MD FCAP

From left to right: Eric Q. Konnick, MD Lewis A. Hassell, MD, FCAP

From left to right: Patricia M. Raciti, MD Lewis A. Hassell, MD, FCAP

### **John H. Rippey Grant for Laboratory Quality Assurance**

Funding two innovative projects that aim to advance patient care or patient safety through laboratory quality assurance improvement efforts, this grant in 2014 supported CAP member research in flow cytometry, which aimed to reduce and potentially automate assay variability. In another project, our grant made it possible to produce training for continuous improvement systems.

### **Award Recipients:**

### Daniel S. Herman, MD, PhD and David P. Ng, MD, PhD, FCAP

University of Washington Medical Center

Seattle, Washington

"Ultimately, our goal will be the creation of open source tools that will automatically perform specified parameter extractions, sample-specific quality control, and longitudinal quality management through moving- average calculations. By creating these tools, we hope to democratize and speed the adoption of this technology among flow cytometry laboratories and instrument vendors."

### Joe Rutledge. MD. FCAP

Seattle Children's Hospital

Seattle, Washington

"Our laboratory led the hospital's adoption of the Toyota Production System as a vehicle for continuous improvement. In the last two years, we have instituted and refined a daily management system (DMS) that is now often a site for healthcare executives' tours and laboratory colleagues visiting our hospital. With the Rippey Grant, we will produce a webinar with embedded video so that other laboratories can construct one component of their own DMS to enhance laboratory quality and patient safety."

### **Leadership Development Awards**

This long-standing program immerses pathology residents in issues confronting the specialty, particularly those that illustrate the need to deliver patient-centric care. Awarded up to \$1,000 to offset travel expenses, select young pathologists travel to the CAP Policy Meeting, or the Residents Forum fall or spring meeting.

### **Award Recipients:**

### Melissa M. Blessing, DO

Mavo Clinic

Rochester, Minnesota

"Learning how issues such as meaningful use criteria and SGR apply to pathology compared to other fields of medicine is empowering. It is essential that we have a voice in these important issues. As my career progresses I hope to continue attending CAP Policy meetings, serving on relevant committees, and educating myself and my colleagues on current health policy issues facing our subspecialty."

### Eric Q. Konnick. MD. MS

University of Washington,

Seattle, Washington

"I learned a great deal from speaking to pathologists from diverse practice settings who I would not otherwise had a chance to meet, and I came away with a better understanding of the professional landscape of pathology and medicine in general. And while I have already been speaking directly with staff from my representatives and senators, I gained specific new insights-for example, we may need to identify and engage with targeted bureaucrats who are more directly responsible for determining how and what physicians are paid."

### Patricia M. Raciti. MD

New York Presbyterian-Columbia University Medical Center New York, New York

"I gained exposure to aspects of pathology that are beyond the scope of traditional residency training. The importance of continued engagement with the CAP as well as in my local and state pathology societies was clear. Most significantly, I learned that I can have the most impact by speaking to and educating politicians, political aides, and my colleagues on how political issues affect clinical practice."

### Partnership: "Involve me and I learn"

In 2014, Leadership Development Award program participants were paired with a partner member of the CAP's House of Delegates.

Delegate and partner Meenakshi Singh, MD, FCAP, then a pathology fellowship director at Stony Brook **University in New York, reported:** 

"I enjoyed meeting and having in-depth discussions with Dr. Raciti. We stayed in touch this year after she began her fellowship. I was thrilled to mentor a dedicated and brilliant young pathologist. As a chair, I have a great interest in formal mentoring programs for residents, fellows, and early-career pathologists. These efforts made in partnership with the CAP will result in an effective and sustained impact on the career of many pathologists."

### **Keitges Program on Medical Ethics**

Through the Pierre W. Keitges, MD, Medical Ethics Endowment Fund, the CAP Foundation sponsors education specific to medical ethics at the CAP's annual meeting, delivering enrichment that engages pathologists to address the changing landscape of medical issues. At CAP '14, participants probed problematic issues around "Disclosing Harmful Pathology Errors to Colleagues, Treating Clinicians, and Patients", a session taught by Suzanne Dintzis, MD, PhD, FCAP, and Mari Rendi, MD, PhD, FCAP.

### The Herbek Humanitarian **Award**

From left to right: Lewis A. Hassell, MD. FCAP Barbarajean Magnani, PhD, MD, FCAP Gene Herbek, MD, FCAP

Presented at CAP '14. Chicago

CAP Member Recipient: Barbarajean Magnani, PhD, MD, FCAP

**Grant Amount: \$7,500** Sunday, September 7, 2014

For the third consecutive year, the Jean and Gene Herbek Humanitarian Award recognized a CAP member dedicated to enhancing See, Test & Treat beyond its core services or to fulfilling an unmet need.

In 2014, Barbarajean Magnani, PhD, MD, FCAP, pathologist-in-chief at Tufts Medical Center, Boston, received the honor. For more than five years, Dr. Magnani has spearheaded See, Test & Treat screenings to serve patients in struggling neighborhoods and communities of Boston. She will apply the monetary component of the award to conduct and publish a study evaluating five years of See, Test & Treat program impact. The data she'll explore will yield valuable evidence to propel our program to serve more women and families at risk.

Dr. Magnani says See, Test & Treat brings the patient and the pathologist closer together. "Patients can pull aside the curtain and see that pathologists are the doctors behind the diagnosis," she said.

"Our ability to grow our programs and to bestow the Herbek Humanitarian Award would not be possible without the generous support of our donor community," explained 2014 CAP Foundation Board President Lewis A. Hassell, MD, FCAP as he presented the award at CAP '14. "To all who support the CAP Foundation and See, Test & Treat, we thank you."

The award is named for 2013-2015 CAP President Gene N. Herbek, MD, FCAP, who first introduced the See, Test & Treat cancer screening program 15 years ago, and for his wife Jean, who shares his commitment.

Barnes-Jewish Hospital and the Siteman Cancer Center, in partnership with the Washington University School of Medicine in St. Louis

### **PARTICIPANTS**

89 women screened

### **HIGHLIGHTS**

12.5% received abnormal Pap test results; 20.5% received abnormal breast screenings.

Rhode Island Hospital in partnership with Women & Infants Hospital at the Lifespan Community Health Center

### **PARTICIPANTS**

40 women screened

### **HIGHLIGHTS**

One breast screening resulted in an early diagnosis of invasive ductal carcinoma.

### **ORGANIZER**

Latha Pisharodi, MD, FCAP

St. David's Medical Center

### **PARTICIPANTS**

54 women screened

### **HIGHLIGHTS**

An additional 150 members of the community participated in health fair offerings, such as healthy cooking demonstrations and general cancer education.

### **ORGANIZER**

Jennifer E. Blankenship, MD, FCAP

NorthPoint Health & Wellness Center in partnership with Hennepin County Medical Center physicians and staff

### **PARTICIPANTS**

233 women screened

### **HIGHLIGHTS**

Each day of the three-day program targeted specific ethnicities by providing culturally appropriate education and information.

### **ORGANIZER**

Bradley M. Linzie, MD, FCAP

HOPE Clinic partnered with staff from Houston Methodist Hospital, Baylor College of Medicine, MD Anderson Cancer Center. University of Texas Health, and Texas Children's Hospital

### **PARTICIPANTS**

147 women screened

### HIGHLIGHTS

Approximately 10% received abnormal Pap test results.

### **ORGANIZER**

Donna M. Coffey, MD, FCAP, and Patricia Chevez-Barrios, MD, FCAP

### **ORGANIZATION**

Lone Star Family Health Center

### **PARTICIPANTS**

121 women screened

### **HIGHLIGHTS**

Out of the 20% of abnormal breast screenings, four cancer cases were discovered and referred for additional testing and treatment.

### **ORGANIZER**

Kyle L. Eskue, MD, FCAP

**Tufts Medical Center** 

### **PARTICIPANTS**

35 women screened

### **HIGHLIGHTS**

23% of cervical cancer screenings were found to be abnormal.

### **ORGANIZER**

Barbarajean Magnani, PhD, MD, FCAP

### The Impact of See, Test & Treat **IN JUST ONE DAY** at the Lone Star Family Health Center

By Marilyn Kasmiersky, Director of Business Development Lone Star Family Health Center. Conroe. Texas

Of our 121 registered patients, there were eight colposcopies, two endometrial biopsies, 45 mammograms, four breast cancer detections, and two oral cancer detections. We referred 35 ladies to our eligibility manager, and 30 made appointments for the health care marketplace. In addition, 142 patients and family members attended the educational speaker series, and we had 14 community partners sharing knowledge.

All of the ladies with atypical test results were connected with our case manager to navigate to the best resources for them individually. Some qualified for and benefitted from Medicaid Breast Cancer Services. One qualified for our health system's financial assistance, and another accessed The Rose, a Texas preventive care program funded through the Cancer Prevention and Research Institute of Texas.

I know we made a difference in so many lives with the CAP Foundation's support and the See, Test & Treat grant.

### **Meet Champions of Patient-Centered Service**

Pathologists who coordinate and lead See. Test & Treat screenings connect growing numbers of patients and families with the community of clinical care providers they need. Get to know the commitments and insights that spur our collective success:

### Donna M. Coffey, MD, FCAP

Dr. Coffey teamed with Patricia Chavez-Barrios, MD, FCAP, to lead the Houston HOPE Clinic See, Test & Treat.

"With the highest percent of medically uninsured adults in the nation, Texas urgently needs the See, Test & Treat program. Moreover, cervical and breast cancers are more common and more likely to be fatal among our growing minority populations. But with regular screening, these women can learn more about their risks, and we can detect cancers early when the potential for survival is greatest."

### Kyle L. Eskue, MD, FCAP

Dr. Eskue led See. Test & Treat in Conroe. Texas. at the Lone Star Family Health Center where 53% of adults in the community are medically uninsured.

"Our goal is not simply to provide same-day screenings and results. We also want to connect participants to an established medical home so that their comprehensive, long-term medical needs can be met."

### Latha Pisharodi, MD, FCAP

With a second annual See, Test & Treat in Providence, Rhode Island, Dr. Pisharodi widened our patient reach while raising the visible value of pathologists in the community.

"We are applying what we learn from one event to the plans and resources of the next. What did I learn from my See. Test & Treat? That teamwork, collaboration. and dedication to excellence lead to quality, successful care. At the end of it all, we were able to help women in Rhode Island receive medical care."

### Erin Rubin. MD. FCAP

Dr. Rubin led the See, Test & Treat at Barnes-Jewish Hospital and the Siteman Cancer Center, in partnership with the Washington University School of Medicine in St. Louis.

"This was a great opportunity for my institution and department to show patients that a good pathologist is just as important as a good surgeon."

### Bradlev M. Linzie. MD. FCAP

Dr. Linzie's annual, multiday See, Test & Treat screenings at the NorthPoint Health & Wellness Center in Minneapolis, Minnesota, are now in their 10th year.

"I decided to show people something that only a pathologist could. Het them look in the other side of my dual-headed microscope and showed them what cancer cells, their own cells, and healthy tissues look like. People are amazed by what they can see."

"The looks of amazement on their faces made it seem all new to me too. I realized that I had stumbled onto a way to give patients an unforgettable positive memory about the Pap test and pathologists."

### Jennifer E. Blankenship, MD. FCAP

Dr. Blankenship led her first See, Test & Treat in Austin, Texas. The program was positively evaluated by the Cancer Prevention & Research Institute of Texas.

"See, Test & Treat connects women with care in their communities—care that speaks their language and understands their challenges. With regular screening, these women can learn more about their unique risks, and we can detect cancers early, when the potential for survival is greatest."

### **Insights from Attending Pathologists**

### **Timothy Craig Allen, MD, JD, FCAP**

University of Texas Medical Branch at Galveston Galveston, Texas

"I attended the HOPE Clinic See. Test & Treat, and it became glaringly obvious; This is public health and this model is the future of medicine—care that is highly efficient and highly coordinated, with patient testing and results delivered in the same day, all in a manner that is dignified and respectful."

### Michael J Misialek, MD, FCAP

**Newton-Wellesley Hospital** Boston, Massachusetts

"I met a See, Test & Treat patient who was diagnosed with breast cancer at the same event a year prior. Ironically, I consider her one of the lucky ones. Her breast cancer was diagnosed quickly, and she was immediately connected to treatment in her community. The patients seen at these events are only a fraction of the vulnerable population in need. I can't help but wonder how many other women are still out there with diagnoses that need to be found."

#### Edward O. Uthman. MD. FCAP

Oakbend Medical Center Richmond, Texas

"I participated in my first See Test & Treat, and I have no idea how the CAP Foundation delivers such a big-scale, complex, multidisciplinary project—but it happened! In a magical trick that I don't think even the most lavish VIP concierge medical practice has ever pulled off, the Pap tests for all patients were reported in plenty of time for the gynecologists to perform the needed colposcopies the very same day."

### **Patients Speak: The Strength of See, Test & Treat**

### Kieshia Bell. St. Louis. Missouri

CAP Foundation See. Test & Treat patient

"I gained much more than cancer screening from the See, Test & Treat pathologists here in St. Louis today. It's been a full day of activities and education. Pathologists showed me healthy and unhealthy cells compared under a microscope—these doctors rock! I know my daughter would rather be at the park today, but I also know that if I am not healthy, I'll be no good to her. To take care of my children, I have to take care of me."

### Michelle Dodson, St. Louis, Missouri

CAP Foundation See. Test & Treat patient

"Not only did they provide the routine cervical and breast cancer screening I needed, but they connected me with a participating patient navigator here so I had support to help me enroll in Missouri's Health Insurance Exchanges."

### Maltina Rouch, Houston, Texas

CAP Foundation See. Test & Treat patient

"Programs like this empower women to seek help and give them a sense of togetherness. Lately, I have been having some health problems, and because I am currently out of work, I would not be able to get these tests done any other way."

### Emma Estrada. Conroe. Texas

CAP Foundation See, Test & Treat patient

"I waited 10 years to get a mammogram; thanks so much to the pathologists who offer this program. Women should not be afraid to get screening. Today's See, Test & Treat made me feel comfortable, and I was able to talk with doctors and ask questions. The best part of the program was talking with a pathologist; I learned so much about why a Pap test is important. "

2014 CAP Foundation Annual Report

### **Delivering an Opportunity for My Institution**

By Erin Rubin, MD, FCAP

Posted on CAPConnect, the CAP-member online community

Most of the 90 patients who participated in the recent See Test & Treat event at the Siteman Cancer Center in St. Louis want to have regular cervical screenings and mammograms, but it comes down to ability and access.

Whether it's transportation or lack of insurance—or more often both of these plus more—these women are not able to receive necessary medical testing.

### Here are just two of their stories:

"There is a lot of cancer in my family," said Pam, who hasn't had health insurance since 2008, when she lost her job at a bank. "The waiting and not knowing had me living in fear. My aunt died of ovarian cancer. I have never been treated the way that I was treated today. Everyone here treated me like a queen, not just a number. Everyone here is so nice. They want to be here." Pam's Pap test was normal.

"Here they make the process feel normal," said Nancy. "Volunteers are happy to be here. When I go to some of the Medicaid clinics, I wait 3-4 hours. Here, they are welcoming. They respect me. No one is looking down on me ... Here they don't treat us like charity." Nancy, 42, hasn't had a Pap test or mammogram, even though she has a family history of cancer-four aunts have died from breast cancer.

See, Test & Treat is just one of the CAP Foundation-sponsored opportunities to emphasize the important role of pathologists in patients' care and health. An accurate diagnosis is imperative to patient care.

"Unfortunately, lack of routine screening for cervical and breast cancer leads to a lack of detection amongst the underserved. See, Test & Treat provides a navigated model of health care and education that empowers women and their families to access routine care. "

### From Uninsured and Undiagnosed to Treatment in 40 days

Marilyn Kasmiersky, Director of Business Development | Lone Star Family Health Center | Conroe, Texas

"We identified a breast lump in one of the See, Test & Treat patients we screened. That day, we referred her to one of our care providers for follow-up care. She was able to get a biopsy right way, which confirmed that the lump was a malignant tumor. She had surgery within a week to remove the tumor. Had it not been for See, Test & Treat, there is no telling how long this woman would have gone undiagnosed. She went from uninsured and undiagnosed to treatment in 40 days. Thank you so much for championing this event in our community. I hope that we can help it grow each year!"

# 2014 CAP Foundation Annual Report

Through the honor roll, the CAP Foundation expresses its deepest gratitude to the following members, friends, staff, corporations, and foundations for the support they have generously given to the CAP Foundation during 2014 and throughout their lifetime.

### **Lifetime Giving of** \$1,000,000 or more

### Is your name missing?

If you think your name should be included in the CAP Foundation Honor Roll of Donors, and it is not, there is probably a logical explanation: We made a mistake. Although we take great care in compiling our list of donors, there is always the possibility of error. If we omitted your name or if your name is incorrect, please accept our apology and notify us of the mistake. This honor roll of donors lists gifts received between January 1, 2014, and January 15, 2015.

If you made a gift before or after those dates, your name will not be listed here. If you believe you made a gift, but you are not sure-we know it can be difficult to keep track of contributions-check your financial records or call our staff, and we will check ours.

If you forgot to send in a contribution last year, consider making a gift now to ensure your name is included in the 2015 CAP Foundation Honor Roll of Donors.
